HMS TECHNOLOGIES, INC. WINS 2009 DHS SMALL BUSINESS ACHIEVEMENT AWARD

Martinsburg, WV - HMS TECHNOLOGIES, INC. (HMS) announced today that congratulations are in order as the company has received the 2009 DHS Small Business Achievement Award. HMS was among 14 other companies, and the only Service Disabled Veteran Owned Small Business in the country to receive the award in a ceremony held on Wednesday, April 29, at the General Services Administration Building in Washington, DC.

The award was accepted by President/CEO Harry M. Siegel, and Carmen Flores, HMS' Product Manager during the ceremony. HMS was specifically recognized for work performed in fiscal year 2008 in support of the Department of Homeland Security, Immigration Customs Enforcement division whose mission is to protect national security by enforcing the nation's customs and immigration laws.

During the year 2008 HMS provided ICE with software and hardware in support of vital DHS programs, creating win-win solutions that exceeded the requirements and expectations of the client.

"Receiving this Small Business Achievement Award is a great honor", said William Kirkpatrick, Vice President of Product Solutions for the company." It is good to know that the software/hardware solutions the HMS team provided is playing a vital role in supporting those programs that protect the immigration laws of the nation we serve, said Kirkpatrick.

In addition to exceeding the client's expectation, HMS was able to foster a partnership/relationship that was nurtured with timely and professional service as a result of our outstanding quality of teammates within the company.
